

Terminal Server Tweaker

www.centia.net

Introduction:

TS Tweaker is small application to apply registry settings commonly used by Terminal Server Administrators to enhance servers running Terminal Server. Changing the registry can be risky and you do so at your own risk. Centia will not take any responsibility for problems caused by modifying the registry.

System requirements:

2000 or 2003 server
.Net 2.0 Framework

Setup:

Run setup.exe - no reboot required.

Usage:

Change settings as required then reboot automatically or manually.

Bug report:

Feel free to report bugs to ricky.elqasem@centia.net

Additions:

Feel free to send in additional enhancements that maybe useful in later versions to ricky.elqasem@centia.net.
